Connecting with *your* world

BMTS/BMI is an independent telecommunications company that continues to grow and expand with state-of-the-art technology.

Superior Service Competitive Rates

We can help find the real communication solutions your business needs. We've been finding solutions for business for over 90 years. Reliable service, superior technology and competitive rates –we offer it for all your business communication needs.

A Part of Your Community

BMTS/BMI prides itself on being a responsible corporate citizen. We demonstrate our commitment to community and economic development with tourism initiatives, event sponsorship, web site hosting, and active involvement in all of the communities where we work.

Trust in 90 Years of Experience

BMTS/BMI was founded as the Bruce Telephone System in 1910.

In those early years, telephone users would string iron wires through farmers' fields to enable them to talk to each other. Many of the 213 customers in 1913 shared their line with their neighbours and the service was limited to certain hours of the day, too.

As the years passed, BMTS continued to grow and keep current with state-of-the art technologies, including today's digital switching equipment and fibre optic cable. Now, BMTS is one of the most modern telephone companies in the world.
